

Process Automation in SMEs

How Dierig AG Saves 450 Hours Annually with Robotic Process Automation – with Minimal Effort.

In an owner-managed business, every moment counts. Your time should flow into growing your business – not into manual, time-consuming and error-prone tasks. Our solutions automate repetitive processes, enabling you to work faster, more accurately, and more cost-effectively.

Case Study – Dierig AG

Dierig AG, a long-established company from Switzerland, faced a challenge: customer documents arrived in various PDF formats via email and had to be entered manually into the ERP system (Abacus). This process was slow, error-prone, and time-consuming.

Our Solution

By leveraging Robotic Process Automation (RPA) and Artificial Intelligence (AI), we automated this process. Within just a few days, the solution was up and running – and the results were immediately measurable:

- **Efficiency boost:** 90% less effort in order processing and 450 more hours per year through automation.
- **Quality assurance:** No human errors caused by fatigue, distraction, or lapses in concentration.
- **Speed:** Significantly faster processing.

What does this mean for your company?

With Auximo, you save not only time but also money. More time for what truly matters: your business.

Customer Experiences

«Working with Auximo was very pragmatic and goal-oriented. The automation not only saved us time but also significantly improved the quality of our processes. We look forward to identifying further optimization potential together.» — Michael Jäggle, Managing Director, Dierig AG

Minimal effort for you – Maximum impact for your business

In just a few days, we fundamentally transformed order management at Dierig AG. How does it look in your company? Let's find out together where your time is being lost and how our RPA and AI technology can help. We offer a short initial consultation to quickly determine if – and how – we can support you.

Digitalization with strategy, speed, and impact.
